

# DJABvisualizer.com

DJ AB Visualizer is a 6x5 foot LED light wall that has built-in microphones to detect and translate noise, voice, and music into a visually appealing display of lights.

Ever wonder what sound looks like? You have wandered to the correct place. DJ AB Visualizer provides DJs, their fans and those who enjoy going to night clubs a world-class experience of feeling more connected to the rhythm of the music by seeing it displayed right before their eyes. Using both visual and auditory senses allows for the audience to become more engaged with the music and see it become more life-like right here, right now. Immerse yourself in your favorite music today by trying out your very own DJ AB Visualizer at home, in the club, or in your studio.
